TODAY & TOMORROW

RUSH — TIME DATED

(Newsbriefs continued)

A symposium on "Helping the High Risk Infant: A Multi-Disciplinary Approach" will be held on Saturday and Sunday, March 21 and 22 at the Jack Tar Hotel. Keynote speaker for the symposium is William H. Tooley, professor, Pediatrics, and senior staff, CVRI.

Sponsored by Continuing Education in the Health Sciences, Bay Area Chapter of the March of Dimes and the California State Department of Developmental Services, the program will focus on current high risk infant programs around the country, including political and ethical implications, status of relevant federal legislation, and related research. For further information call x2894.

A School of Nursing researcher has published findings of a case study of research protocols requiring human subjects in which no humans were found to be at risk. This study is an important step in providing information on types of research that can be exempted or have expedited reviews by federally mandated Institutional Review Boards (IRB's) which were established by the U.S. Public Health Service to assure the protection of people's rights who volunteer as subjects for biomedical and behavioral research.

Susan R. Gortner, professor and associate dean for research, published "The Institutional Review Board: A Case Study of No-Risk Decisions in Health-Related Research," in the January/February 1981 issue of *Nursing Research*. Co-authors are Erica Heath, administrative analyst, Human and Environmental Protection Committees, and Patricia Sanders, a student in the master of nursing science program.

UCSF's Health Policy Program, directed by Philip R. Lee, professor of Social Medicine, has been designated as an Organized Research Unit by the UC Regents, and renamed the Institute for Health Policy Studies.

The program, which began in 1972 to coordinate research and public service in Federal health policy, has grown to include faculty, research and administrative staff from a wide variety of disciplines. It has received over $5 million in funding over the last five years. In 1977, it was awarded a five-year grant from the National Center for Health Services, Department of Health and Human Services, to become the first Health Service Policy Analysis Center in the country.

The new institute will advance knowledge of health services and policies through basic and applied research, apply research findings to health policy problems at the national, state and local levels, and provide education and training opportunities for students and professional practitioners from a variety of disciplinary backgrounds.

Nominations and applications are being accepted for the position of associate dean, Graduate Division. The Graduate Division administers 24 master's and doctoral degree programs in the Health Sciences, enrolling approximately 750 students. The associate dean works closely with the dean on all matters, but has primary responsibility for the following: admissions and graduate student progress toward degrees, graduate student fellowships, tuition waivers, loans, research and travel grants, and development of an affirmative action program in cooperation with the directors of graduate programs.

Send curriculum vitae and other supporting material to Lloyd M. Kozloff, dean, Graduate Division, S 140, by Monday, March 16.

The LPPI Habit Abatement Clinic will soon stop taking applications for its Stop-Smoking program. If you are between the ages of 21 and 55 and would like to stop smoking, contact the clinic at 681-8080, extension 453.

Bruce M. Alberts, professor of Biochemistry and Biophysics, has been appointed American Cancer Society Research Professor of Biochemistry. The coveted grant is recognition of Alberts' scientific preeminence and will fund most of his salary here on campus until his retirement.

There are a total of 22 American Cancer Society Research Professors in the country, two within the UC System — Alberts and S. Jonathan Singer from UC-San Diego, a recipient in 1976.

A member of the UCSF faculty since 1976, Alberts was one of nine UC scientists elected to the American Academy of Arts and Sciences in 1978 — one of the highest professional honors a scholar can receive.

Alberts is a graduate of Harvard and was named the Damon Pfeiffer Professor of Life Sciences at Princeton in 1973. He was a recipient of the Eli Lilly Award in Biological Chemistry from the American Chemical Society, and the U.S. Steel Foundation Award in Molecular Biology from the National Academy of Sciences. He presently serves on the editorial board of the *Journal of Biological Chemistry.*

High school students from the S.F. Unified School District's Allied Medical Program are volunteering their services in the Hospitals and Clinics from March 2 to June 5. Students are available to work Tuesdays through Thursdays 8 to 10 a.m. and 2 to 4 p.m. Any Hospitals and Clinics department interested in providing a student exposure to a career opportunity should contact the Volunteer Office at x1196.

The dictating system access codes for Hospitals and Clinics have been changed to the following: discharge summaries from 53 to 73, operation reports from 54 to 74 and clinical referral letters from 55 to 75. For further information contact Sylvia DeAlba, x1623.

A dozen trees are being planted on the south side of Parnassus in front of buildings at the western end of campus. This is the first phase of a program which will eventually cover the entire Parnassus area and is part of the Campus Beautification Program. It is hoped that the trees also will act as a wind break and that the planters will serve as rest spots for the campus community and neighborhood. Money for the tree planting has come from contributions from various campus sources.

A special event planned for May or early June will involve the entire campus in flower planting and other beautification activities.

The Rape Prevention Education Program has just lined up its self-defense classes and workshops for the Spring quarter. Instructors will be from the Women's Protection Program of the Marin Rape Crisis Center. The classes and workshops are as follows:

- One Day Self-Defense Workshop. Mar. 14, Apr. 18 & May 30, 9 a.m. to 5 p.m. (You need only attend one session). Free to the campus community; $20 general.
- Women's 30 Hr. Class: Mondays, Apr. 6-June 29, 5:30-8 p.m. or Tuesdays, Apr. 7-June 23, 5:30-8 p.m. or Mondays & Wednesdays, Apr. 6-June 15, noon-1:30 p.m. (This last session meets twice a week.) $10 campus community; $30 general.
- Men's 30 Hr. Class: Mondays, Apr. 6-June 29, 7:30-10 p.m. $10 campus community; $30 general.
- Girl's Two Day Self-Defense Workshop: For girls ages 7-14. Tuesday & Thursday, Apr. 21 & 23, 3-5 p.m. $8 per child.

Pre-registration is required for all classes and workshops. All checks for registration fees and cancellations must be received one week prior to the class. For further information and pre-registration call x5683.

There is an extension to the boundaries of the "J" resident permit parking area close to the campus.

The streets involved are *Arguello Boulevard* on the west side between Lincoln Way and Irving Street and on the east side between Frederick and Carl Streets; *Carl Street* on the south side between Willard Street and Hillway Ave. and on the north side between Willard Street and Arguello Boulevard; and both sides of *Willard Street* between Frederick and Carl Streets.

The map shows this additional area plus the original "J" area. The black dotted lines show the areas with 2 hour parking, 8 a.m. to 5 p.m., Monday to Friday, except vehicles with permits. For further information call x1511.

Nominations are being accepted for the J. Elliott Royer Award. The award includes a cash grant of $15,000 and is presented annually by UCSF to the S.F. or East Bay physician who, during the previous year, "has made the most significant contribution to psychiatry and neurology."

In accordance with the terms of Royer's will, the award is made by the UC Regents upon the recommendation of a committee consisting of the dean and two faculty members of the School of Medicine and the presidents of the S.F. Medical Society and the Alameda-Contra Costa Medical Association.

Nominees must be actively engaged in the practice of medicine in S.F., Contra Costa or Alameda County (not necessarily on a full-time basis). Letters of recommendation detailing reasons for nomination should be sent to the Royer Award Committee, Dean's Office, School of Medicine, S 224, by June 5.

The most recent recipients of the award have been David W. Allen, clinical professor, Psychiatry; J. Richard Baringer, vice chair and professor, Neurology; Mardi J. Horowitz, professor, Psychiatry; and Charles B. Wilson, professor and chairman, Neurosurgery.
